

Development medical technology: From idea to market readiness

High-Class Medical Technology. First-Class Service.

Services Engineering

In partnership with national and international customers, seleon develops individual solutions for complex medical technology devices. Through extensive engineering knowledge and years of experience, we consistently and efficiently implement your ideas in medical-technical products and lead them safely towards “time to market”.

In particular, the professionalism of our experts in the areas of **Regulatory Affairs, system engineering, design, electronics, software and firmware** allows us to fall back on a multitude of technologies. Our cus-

tomers benefit from the specialist knowledge of the interdisciplinary development teams across the entire product development process – from conception to the development of functional models, prototypes and final products.

As medical technology experts, we observe all relevant regulations and applicable standards right from the start of the design phase.

We turn your ideas into high-quality products that are at the forefront of medical technology.

Project examples

Babyphone "Sandy"

Negative Pressure Wound Therapy

Blood Pressure and HZV Monitoring

Non-Invasive CGM System

Modular Docking Station "Jenny"

QR-Robot System

Digital Gas Mixer

Dry water massage bed
